DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, 17-24 and 55-56, drawn to sound and visual parameter adjustments for a theater system, classified in class 381, subclass 300, 307, 56, 58 and 103; and class 348, subclasses 602 and 603.
 - II. Claims 25-35, 37-46 and 48-54, drawn to visual parameters of a theater by use of a remote control device, classified in class 348, subclass 602-603, and class 345, subclass 158, 169, 690.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the visual adjustments are not required in to order adjust the audio parameters in a surround sound system for producing audio, as the same would apply the uselessness audio adjustments for a visual/video device. The subcombination has separate utility such as being solely in any visual or video production device and like for adjusting visual parameters.

Art Unit: 2644

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Sung Oh on November 18, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
